Author Index Volume 148 (2002)

Ainsworth, M. and **K. Pinchedez,** The *hp*-MITC finite element method for the Reissner–Mindlin plate problem 429–462

Balinsky, A.A. and **W.D. Evans,** On the spectral properties of the Brown–Ravenhall operator 239–255
Behncke, H. and **A. Fischer,** Spectral properties of a differential system 267–285
Behncke, H., The spectrum of differential operators with almost constant coefficients II 287–305
Bennewitz, C. and **B.M. Brown,** A limit point criterion with applications to nonselfadjoint equations 257–265
Binding, P.A., P.J. Browne and **B.A. Watson,** Sturm–Liouville problems with boundary conditions rationally dependent on the eigenparameter, II 147–168
Breimesser, S.V., J.D.E. Grant and **D.B. Pearson,** Value distribution and spectral theory of Schrödinger operators with L^2-sparse potentials 307–322
Brown, B.M. and **M.S.P. Eastham,** Analytic continuation and resonance-free regions for Sturm–Liouville potentials with power decay 49– 63
Brown, B.M. and **W. Reichel,** Computing eigenvalues and Fučik-spectrum of the radially symmetric *p*-Laplacian 183–211
Brown, B.M., R.A. Peacock and **R. Weikard,** A local Borg–Marchenko theorem for complex potentials 115–131
Brown, B.M., see **Bennewitz, C.** 257–265
Browne, P.J., see **Binding, P.A.** 147–168

Davies, E.B. and **J. Nath,** Schrödinger operators with slowly decaying potentials 1– 28
Dette, H. and **W.J. Studden,** A note on the matrix valued q-d algorithm and matrix orthogonal polynomials on [0, 1] and [0, ∞) 349–361

Eastham, M.S.P., see **Brown, B.M.** 49– 63
Edwards, J.T., N.J. Ford and **A.C. Simpson,** The numerical solution of linear multi-term fractional differential equations: systems of equations 401–418
Evans, W.D., see **Balinsky, A.A.** 239–255
Everitt, W.N. and **A. Poulkou,** Kramer analytic kernels and first-order boundary value problems 29– 47
Everitt, W.N., L.L. Littlejohn and **R. Wellman,** Legendre polynomials, Legendre–Stirling numbers, and the left-definite spectral analysis of the Legendre differential expression 213–238

Fischer, A., see **Behncke, H.** 267–285
Ford, N.J., see **Edwards, J.T.** 401–418

Grant, J.D.E., see **Breimesser, S.V.** 307–322

Hinton, D., On the location of the least point of the essential spectrum 77– 89
Hitrik, M., Existence of resonances in magnetic scattering 91– 97

Knowles, I.W., An inverse problem for Hamiltonian systems 99–113

Littlejohn, L.L., see **Everitt, W.N.** 213–238
Lott, J. and **G. Stolz,** The spectral minimum for random displacement models 133–146

MacLeod, A.J., The efficient computation of some generalised exponential integrals 363–374
Marletta, M. and **A. Zettl,** Counting and computing eigenvalues of left-definite Sturm–Liouville problems 65– 75

Nath, J., see **Davies, E.B.** 1– 28

Paris, R.B., A uniform asymptotic expansion for the incomplete gamma function 323–339
Peacock, R.A., see **Brown, B.M.** 115–131
Pearson, D.B., see **Breimesser, S.V.** 307–322
Pinchedez, K., see **Ainsworth, M.** 429–462
Poulkou, A., see **Everitt, W.N.** 29– 47

Reichel, W., see **Brown, B.M.** 183–211

Schmidt, K.M., Eigenvalues in gaps of perturbed periodic Dirac operators: numerical evidence 169–181
Simpson, A.C., see **Edwards, J.T.** 401–418
Steidl, G., see **Strauss, D.J.** 375–400
Stolz, G., see **Lott, J.** 133–146
Strauss, D.J. and **G. Steidl,** Hybrid wavelet-support vector classification of waveforms 375–400
Studden, W.J., see **Dette, H.** 349–361

PII: S0377-0427(02)00776-8

Watson, B.A., see **Binding, P.A.** 147–168
Weikard, R., see **Brown, B.M.** 115–131
Wellman, R., see **Everitt, W.N.** 213–238

Yakubovich, S.B., Index transforms associated with products of Whittaker's functions 419–427

Zettl, A., see **Marletta, M.** 65– 75
Zhu, G., see **Zhu, X.** 341–348
Zhu, X. and **G. Zhu**, A method for directly finding the denominator values of rational interpolants 341–348
